Designing with the AMD 7-Series Families

2 days - 14 hours

OBJECTIVES

- After completing this training, you will have the necessary skills to:
  - 1- Describe the new CLB capabilities and the impact that they make on your HDL coding style
  - 2- Define the block RAM, FIFO, and DSP resources available
  - 3 - Properly design for the I/O and SERDES resources
  - 4 - Identify the MMCM, PLL, and clock routing resources
  - 5 - Describe the hard resources available (DDR3, transceivers, ...)

PREREQUISITES

- Basic knowledge FPGAs architectures
- A successful first experience of designing an VHDL–based FPGA

CONCERNED PUBLIC

- Technicians and Engineers in Digital Electronics
- All our training courses are given at a distance and are accessible to people with reduced mobility.
- Our partner AGEFIPH accompanies us to implement the necessary adaptations related to your disability.
