Designing with Versal™ Serial Transceivers

COURSE DURATION

2 days - 14 hours

TARGET OBJECTIVES AND SKILLS

- 1 - Describe and utilize the transceivers
- 2 - Know how to design, simulate, implement and debug transceivers
- 3 - Identify transceiver use cases and describe board design requirements

CONCERNED PUBLIC

- Technicians and Engineers in Digital Electronics
- All our training courses are given at a distance and are accessible to people with reduced mobility.
- People with disabilities may have special training needs. Our partner AGEFIPH accompanies us to implement the necessary adaptations related to your disability. Don't hesitate to to discuss your requirements.

PREREQUISITES

- Knowledge of Verilog or VHDL
- Familiarity with logic design (state machines and synchronous design)
- Some experience with AMD Vivado™ implementation
- Some experience with a simulation tool, preferably the Vivado simulator
- Familiarity with serial I/O basics and high-speed serial I/O standards is also helpful

NOTES

- Release date: 03/10/2025

COURSE CONTENT

DAY 1

- Objective 1
  - Serial Transceiver Shared Features {Lecture}
  - Serial Transceiver Architecture {Lecture}
- Objective 2
  - Transceiver IP Generation {Lecture, Lab}
  - Transceiver IP Simulation {Lecture, Lab}
  - Transceiver IP Implementation {Lecture, Lab}

DAY 2

- Objective 2
  - GTM Transceiver {Lecture, Labs}
- Objective 3
  - Transceiver Use Cases {Lecture}
  - Transceiver Board Design {Lecture}

TEACHING METHODS AND SUPPORT - ASSESSMENT & RECOGNITION

- **Teaching methods :**
  - Alternating lectures, technical questionnaires and exercises on individual machines.
- **Pedagogical follow-up :**
  - Signed attendance sheet
- **Pedagogical assessment :**
  - Continuous assessment and progress sheet :
    - Technical questionnaire
    - Practical work results
    - Validation of objectives
- **Satisfaction survey :**
  - At the end of training: assessment form completed by the trainee
  - At 3 months: evaluation form completed by the trainee after application to the company
- **Certificate :**
  - Training certificate with assessment of learning provided to trainee
  - Certificate of completion provided to employer

TEACHING METHODS

- **Inter-company online training :**
  - Fast Internet connection, webcam, headset
  - Presentation by Webex by Cisco
  - Provision of course material in PDF format
  - Labs on individual Cloud PC by RealVNC
- **Intra-company face-to-face training on customer site : (details to be confirmed prior to training)**
  - Suggested supply by the customer :
    - Training room
    - Video projector
    - Whiteboard
    - Individual PC with AMD tools
  - Provided by MVD Training :
    - Course material in PDF format
    - Practical work on individual PCs (loan of equipment available on request)

RECOMMENDED COMPUTER HARDWARE

- **Inter-company online training :**
  - Recent computer OS Linux or Windows 64-bits
  - Fast Internet, webcam, headset
  - Software tool WebEx Cisco
  - ***AMD remote tools :***
    - Software tool RealVNC Viewer
  - ***AMD local tools :***
    - Software tool AMD Vivado
- **Face-to-face training on customer site :**
  - Recent computer OS Linux or Windows 64-bits
  - Software tool AMD Vivado

TEACHING STAFF

- **William Duluc, Electronics and Telecoms Engineer, AMD Expert since 2009 and AMD Trainer since 2017 :**
  - Expert AMD FPGA - Language VHDL/Verilog - RTL Design
  - Expert AMD SoC & MPSoC - Language C/C++ - System Design
  - Expert DSP & AMD RFSoC – HLS - Matlab - Design DSP RF
  - Expert AMD Versal – AI Engines – Heteregenous System Architect
